

Want to deliver  
personalised support  
on a budget?

How care providers for older people  
can benefit from Community Circles

# How can providers deliver best-practice support when resources are tight?

(Clue: we can help!)

Times are tough in health and social care. Budgets are tight, the population is ageing, and resources are stretched. Despite this, legislation (like the Care Act) and policies such as the NHS 5 Year Forward View call for better, more individualised support and keeping people connected to their communities.

**Community Circles are a practical and effective way to make this happen.**

## What are Community Circles?

**Community Circles help people to be happier, healthier and more connected with the support of those around them. We do this by supporting individuals to achieve a personalised outcome of their choice, by activating their network of relationships and facilitating Circle meetings that take ideas to actions.**

When a care provider funds a Community Circles Connector to work with their clients, they can provide support for up to 40 Circles. By working with our volunteer facilitators, one single Connector is able to make a real difference to a large number of lives, even within tight resources.

## Key benefits for care providers

- Demonstrate a commitment to personalised support as required by the Care Act and CQC
- Act as an effective way to spot any issues before the grow, supporting early intervention
- Support people and their families and friends to stay connected to each other
- Improve, measure and record individual wellbeing levels
